Subject: The Microsoft "remedy"

To whom it may concern

I am a computer user and former worker in the IT industry (I have no reason or desire to work in IT anymore thanks to Microsoft). I find this "settlement" that the Department of Justice proposed to be disgusting and worthless. I believe that it will do nothing to bring competition back into the computer industry and will only harm the United States in the long run. If this "settlement" goes through, then the US will be put into a computer backwater where Microsoft rules and anyone who lives in the US will be unable to "talk" to the rest of world due to Microsoft protocols that don't "work" with any other computer system on the Earth.

If this is what the US government wants, then I am leaving this country as fast as I can.
